Economist who turns ambiguous and complex problems into concrete, documented tools by structuring economic models supported on the consolidation of high-quality data, to help companies and governments make strategic and economic policy decisions.

PROFESSIONAL PROFILE

Professional with 3 years of experience in financial and macroeconomic analysis, through quantitative modeling and the construction of analysis and monitoring tools (Stata, R, Python), proposing innovative solutions, with the ability to translate complex technical results into inputs that add value for executives, central banks and the media. With a track record in the multilateral sector (Latin American Reserve Fund), managing applied research projects through the use of data platforms such as Bloomberg, Capital IQ and BankFocus with a scope of 50+ countries.

PROFESSIONAL EXPERIENCE

Latin American Reserve Fund (FLAR) | Bogotá, Colombia

Research Analyst - Economic Studies Department | Feb 2024 – Present

Responsible for the department's applied research agenda: project structuring, econometric modeling, database construction and participation in economic studies conferences.

- Structured and took part in 15+ financial and macroeconomic analysis projects, from the data analysis stage through the preparation of articles and technical notes for institutional audiences.
- Automated the integration of economic data from Bloomberg, BIS, IMF and the World Bank for 20+ countries, reducing data preparation time by 30%, with replicability of the analyses for the team.
- Prepared a current-conditions report on fiscal and monetary trends in Latin America, discussed with FLAR's Board of Directors, focused on monetary policy decisions for 9 member central banks.
- Built the Economic Monitoring Index, based on natural language processing of economic news for 8 FLAR member countries, today in formal use in the department. And the Satellite Activity Index to measure economic activity from space.
- Led and designed the methodology to assess whether prediction markets (Polymarket) anticipate movements in sovereign risk ahead of elections, and central bank decisions in Latin America, with preliminary results of 75% directional accuracy.

Intern - Economic Studies Department | Aug 2023 - Jan 2024

- Designed and implemented FLAR's first knowledge management pilot with artificial intelligence, establishing a replicable framework adopted institutionally for future analysis and project management initiatives.
- Developed an internal dollarization monitoring dashboard, giving continuous visibility into levels and trends by country for the research team.

Independent Consultant | Bogotá, Colombia

Economic Analyst and Media Consultant | Feb 2025 - Present

- Prepared 20+ executive presentations on the macroeconomic and economic policy landscape of Colombia and Latin America for the economist Mauricio Reina, with broader narratives and better data selection with visual design, aimed at executives and the media, adapting the storytelling and handling of information.

EDUCATION

Economist, minor in Business Administration, emphasis in Finance

Pontificia Universidad Javeriana - Bogotá, Colombia | Mar 2024

GPA: 4.81/5.00 · Summa Cum Laude · Javeriano Order of Academic Merit · Academic Excellence Recognition (CONALPE) · Portafolio Awards Nominee
